

Mobile Fit®

The miraculous suction cup

Mobile Fit is a series of convenient mobile device stands to be used in your automobile.

Designed with simplicity and grace, Mobile Fit uses the special patented elastomer suction cup of latest technology to hold your device.

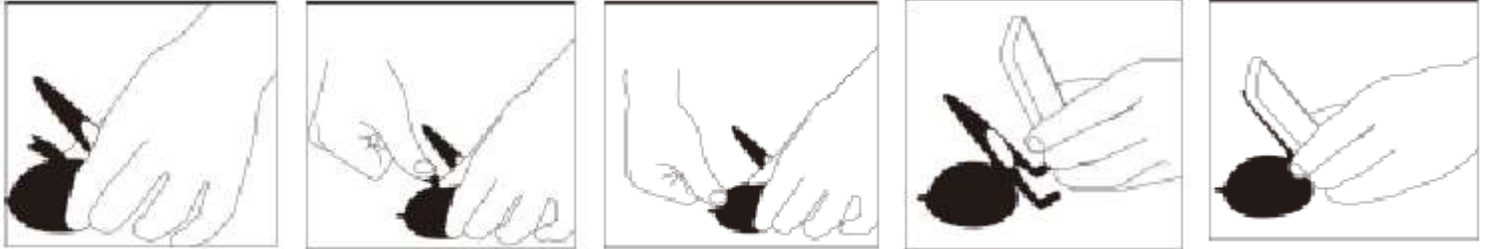

Easy installation, easy removal. Firm attachment on any place you like (even rough leather dashboard), but never leave a trace on your device.

And of course, it is not limited to be used only inside a car.

Easy Installation & Removal

Just put it on any surface press down the lever...done!

Installation

Removal

Any Surface, Strong Absorption

Mobile Fit integrated an effective sucking disc holder on the bottom and elastomer auto-adhesive gel part to bind your device.

Mobile Fit remains stable even on coarse surfaces, which no traditional sucking disc can do. It also grips much more firmly than the traditional sucking disc, protecting passenger & device's safety in fast-moving automobiles.

Easy Restoration

If the sucking disc gets dirty, just rinse with water or simply wipe clean with a wet tissue, allow it to dry, then use it again. You can re-use this product as many times as you like, just clean and it will become like-new.
